

## FIMO leather-effect Scarf clip

### **The ideal accessory for all scarf wearers!**

A scarf doesn't just keep you warm on cool evenings, it quickly turns your dirndl outfit into something very special. Create a real wow effect with your home-made FIMO leather-effect scarf clip. If the weather's still too warm to wear it, it can be used to store your scarf in a practical way and the loop makes it easy to attach to your handbag, for example. It looks great, and when you get cold, you have it close to hand.

## Step-by-step tutorial

1

Roll out a block of FIMO leather-effect in black into a sheet (clay machine setting 8) and cut out a long, wide strip.

The leather effect stands out even better if you move the FIMO sheet gently by hand after rolling it out, pulling it apart a bit.

Lay the FIMO leather-effect sheet flat on the baking paper and harden in the oven for **30 minutes at 130 °C / 266° F on upper and lower heat.**

**Tip:** Work in progress and left-over material should be protected against sun and heat and can be stored in a screw-top jar or in cling film to protect it from dust and dirt.

2

Now draw a 12 cm x 4 cm rectangle on the FIMO leather-effect sheet using the Lumocolor non-permanent.

3

Cut out the rectangle with the scissors.

If you can still see any pen marks, simply remove them with a damp baby wipe.

4

Take a kitchen knife and cut two little horizontal notches in the middle of the back. This is where you will attach your key ring later.

5

Stick a lovely piece of lace or other material that you like on to the back so that it protrudes slightly at the top and bottom.

6

Now attach the studs, key ring and spring hook, and your scarf clip is done.

## Material overview

## What you need

Product	Article no.	Quantity
<b>FIMO® leather-effect 8010</b> Oven-hardening modelling clay - Single product black	8010-909	1
<b>Lumocolor® non-permanent pen 311</b> Non-permanent universal pen S - Single product black	311-9	1
